Finixa Control Spray

The temporary gloss layer of the Finixa Control Spray replaces the clear coat when checking colour without leaving any trace on the surface. Spray a thin layer on a sample plate (that is sprayed with a basecoat) to create a temporary shine. Compare the sample plate with the desired colour for inspection.

TSP 930 is also the perfect tool to detect imperfections. The gloss layer works as a magnifying glass and it will detect errors faster and easier. Finixa Control Spray evaporates completely after use without leaving any residue on the sprayed surface.

Finixa Spray Gun Cleaning Kit

Complete set of tools for cleaning and maintaining spray guns. The set consists of 8 brushes for cleaning the interior, 3 small brushes with holder and one large brush for the exterior, 6 needles with holder for cleaning the nozzle and a bottle of lubricant to maintain the moving parts.
