Control Spray

The temporary gloss layer of the Finixa control spray replaces the clear coat when checking colour, then evaporates without leaving any trace on the surface. Spray a thin layer on a sample plate (that is sprayed with a basecoat) to create a temporary shine. Compare the sample plate with the desired colour for inspection.

Valspar Industrial Paint System (VIM)

VIM offers high performance coatings to provide protection from abrasion, corrosion, and weather on a wide variety on substrates. VIM suits anything from fleet to light industrial, agriculture, and anywhere a strong, durable, top quality coating is required.

Direct to metal technology (no primer required) and accelerated through cure will help you get the job completed faster and more cost effectively.

Valspar's expertise in the industrial sector as a global supplier to leading OEM manufacturers guarantees the quality of their products.

Valspar offers the latest technology in colour tools to compliment the paint system. With readily available formulated colour ranges, and Valspar's colour retrieval software, colour is no problem. If you're not sure of the colour you're after, you can use the Valspar Rainbow Colour box, with over 2,450 painted colour samples to choose the colour you require.

The VIM system is very straight forward and easy to apply, so we believe Valspar Industrial Mix will help you get the job done faster and more cost effectively.

Contact your Linkup Paints representative for further details.
